CONTENTS FOR
FLUID MECHANICS-Soviet Research
Volume 20, Nos. 1-6, 1991

Number 1

1 Experimental Study of Unsteady Boundary Layers
V.A. Gudkov

9 Calculation of the Adherence Factor of Gas Atoms to a Solid Wall
V.M. Pshenichnikov and V.A. Lukin

21 General Solution of the Problem of Hydrodynamic Interaction of N Particles

45 Continuum Description of the Hydrodynamic Interaction between Particles
Yu.N. Kul'bitskiy

50 Numerical Modeling of the Mixing of Gases and Inert Solid Particles in a Plane Turbulent Jet
Ye.A. Smirnykh

58 Three-Dimensional Turbulent Separated Supersonic Gas Flow Over Obstacles Attached to the Edges of Dihedral Corners
A.I. Glagolev, A.I. Zubkov, B.Ye. Lyagushin and Yu.A. Panov

67 Eddy Heat Transfer in Industrial Contact-Type Fixed-Bed Reactor
V.Kh. Matyushenko, B.M. Markeyev and Ye.V. Romancheva

75 The Metastable Region and Scaling
P.P. Bezverkhiy, V.G. Matynets, E.V. Matizen and V.F. Kukarin

82 Thermodynamic Similarity of Separating Solutions
V.P. Skripov and G.I. Pozharskaya

86 Formation of New Phase Near the Stability Boundary
A.V. Chalyy, V.G. Boyko and H.-J. Moegel

92 Thermodynamic Properties of Pure Substances Near the Instability Boundary of a Uniform Phase (the Spinodal) and the "Pseudocritical Indices"
I.M. Abdulagatov and B.G. Alibekov

98 Thermodynamic and Structural Properties of Small Particles of Condensed Phase
S.P. Protsenko

106 Nucleation of Crystals in Supercooled Liquids
V.P. Koverda

113 Conditions of Formation, Preparation and Properties of Single-Component Metallic Glasses
A.P. Baykov, V.A. Ivachenko, V.I. Motorin, S.L. Musher and A.F. Shestak
119 Nucleation of Crystals in Supercooled Binary Alloys at High Nucleation Frequencies
A.A. Dik, V.N. Skokov and V.P. Koverda
123 Stability and Mechanism of Disordering of Crystals with Lennard-Jones Interaction of Particles
A.Ye. Galashev
131 Crystallization of Amorphous Films
I.Ye. Bolotov and V.B. Malkov
137 Kinetics of the Isothermal Crystallization of Amorphous Films of Pure Metals
V.M. Kuz'menko and V.I. Mel'nikov

Number 2

1 Effect of Turbulent Fluctuations on Homogeneous Condensation in a Turbulent Isobaric Submerged Jet
A.B. Vatazhin, A.Yu. Klimenko, A.B. Lebedev and A.A. Sorokin
12 Flows of Gas Mixtures in Diffusers
L.N. Sukhova
17 The Onset of Cavitation in Pipe Flow
M.M. Glazkov, N.A. Prikhod'ko and M.I. Tsybalova
24 Laminar Boundary Layer in an Axisymmetric Convergent Duct
K.G. Asatur and G.A. Kolton
28 Evolution of Impurity Distribution in a Boundary Layer
O.D. Nikishova and O.O. Otkalenko
33 Three-Dimensional Parametric Vibrations of Filaments or Wires in Coaxial Flows
V.I. Poddubnyy and N.V. Saltanov
42 Response of a Tank, Set on a Porous Liquid-Saturated Base, to Seismic Loads
A.N. Trofimchuk and N.P. Yermolenko
49 Flow of Dilute Suspensions of Deformable Ellipsoidal Particles in the Presence of an Applied Electric Field. Unsteady Orientation of Particles
Ye.V. Pridatchenko and Z.V. Pasechnik
54 Prediction of the Force of Impact of Waves on a Plane
G.V. Logvinovich
61 Flow-Induced Forces and Moments Acting on a Semisubmerged Elliptical Structure
Ye.G. Vanina and S.N. Turivenko
67 Relationship between Solutions by Unsteady Wave Problems for Dynamics of Nonconducting and Weakly Conducting Fluids
S.V. Korsunskiy
70 Equilibrium of Metastable Phases. Isokinetic Curves
V.P. Skripov
80 Metastability and Phase Separation in Polymer Systems
A.A. Tager

90 Pulsed Annealing of Amorphous Silicon Films: A Computational Experiment
V.Yu. Balandin, A.V. Dvurechenskiy and L.N. Aleksandrov
98 Homogeneous Nucleation Sites
P.A. Pavlov
108 Growth of Vapor Bubbles and the Acoustic Noise of a Boiling Liquid
Ye.I. Nesis
113 Spontaneous and Induced Flashing of Superheated Liquids
Ye.N. Sinitsyn
120 The Collapse of a Liquid Intrusion in the Discontinuity Layer of a Stably Stratified Liquid
A.I. Kulik and V.S. Maderich
126 The Degeneration of Layer Structures in the Final Stage of Turbulence Decay in a Stratified Fluid
Ye.N. Getman and V.I. Nikishov
134 Numerical Treatment of Supersonic Viscous Gas Flow Over a Concave Conical Wing
N.M. Belyayev, V.L. Borshch and V.V. Kravets
143 Behavior of a Source (or Sink) in a Viscous Imcompressible Fluid Under Nonisothermal Conditions
G.I. Nazarov and N.C. Puchkova

Number 3

1 Motion of a Vortex Ring Generated in an Ideal Fluid Near Solid Walls
M.Yu. Konstantinov and V.V. Meleshko
7 Diffraction of Regular Waves by a System of Arbitrarily Distributed Composite (Two Joined Cylinders) Barriers (Pilings)
A.V. Pyateskiy
15 Effect of Surface Waves on a Vertical Circular Cylinder Supported on a Permeable Seafloor
M.I. Zheleznyak and V.V. Yakovlev
26 Scattering of Unsteady Surface Gravity Waves by an Elastic Irregularity in the Bottom Surfaces of a Water Body
S.V. Korsunskiy
31 Analysis of Propagation of Transient Waves in an Elastic Plate on the Surface of a Liquid
I.T. Selezov and V.A. Tkachenko
37 The Motion of Waves in a Channel of Variable Cross Section
G.I. Nazarov
43 Propagation of Waves on the Surface of a Ponderable Fluid in a Long Convergent Channel
V.I. Yeliseyev
49 Practical Applications of Superheated Liquids
M.M. Martynyuk
62 Thermodynamic Properties and Limits of Stability of Simple Metastable Liquids
V.G. Baydakov

71 Vibration of Bundles of High Eccentricity (Flat Oval) Tubes in Crossflow
V. Katinas, R. Bakas and V. Svedosč
80 Crossflow-Induced Vibrations of Staggered Bundles of Finned Tubes
V. Katinas, E. Perednis and V. Svedosč
89 Heat-Transfer and Hydraulic-Drag Coefficients of Staggered Tube Bundles with Variable Number of Finned Tubes in the Rows
V.B. Kuntysh, A.E. Piir and A.N. Gerasimenko
96 Analysis of the Performance of Adjustable Nozzles
A.A. Garbuz and A.A. Maskalenko
102 A Method of Design of Louvered Separators
A.A. Grandov, Ye.Ye. Nyankina and A.V. Doroshenko
108 Heat Transfer in a Downward Flow of a Film of Viscous, Electrically Conducting Fluid in a Magnetic Field
B.A. Dityatkin and A.I. Kalyutnik
113 Transport of Granular Materials on Sloping Air-Operated Fluidized-Bed Chutes of Different Aerodynamic Resistance
V.A. Kudryashov, V.Yu. Shuvalov and B.V. Berg
121 The Dynamic Stability of a Vertical Aspirating Pipe Conveying a Steady Slurry Flow
V.S. Tikhonov
128 One Case of Seepage from a Channel into Partially Saturated Soil
V.S. Kremez
134 Sonic Flows Over Bodies
S.K. Aslanov

Number 4

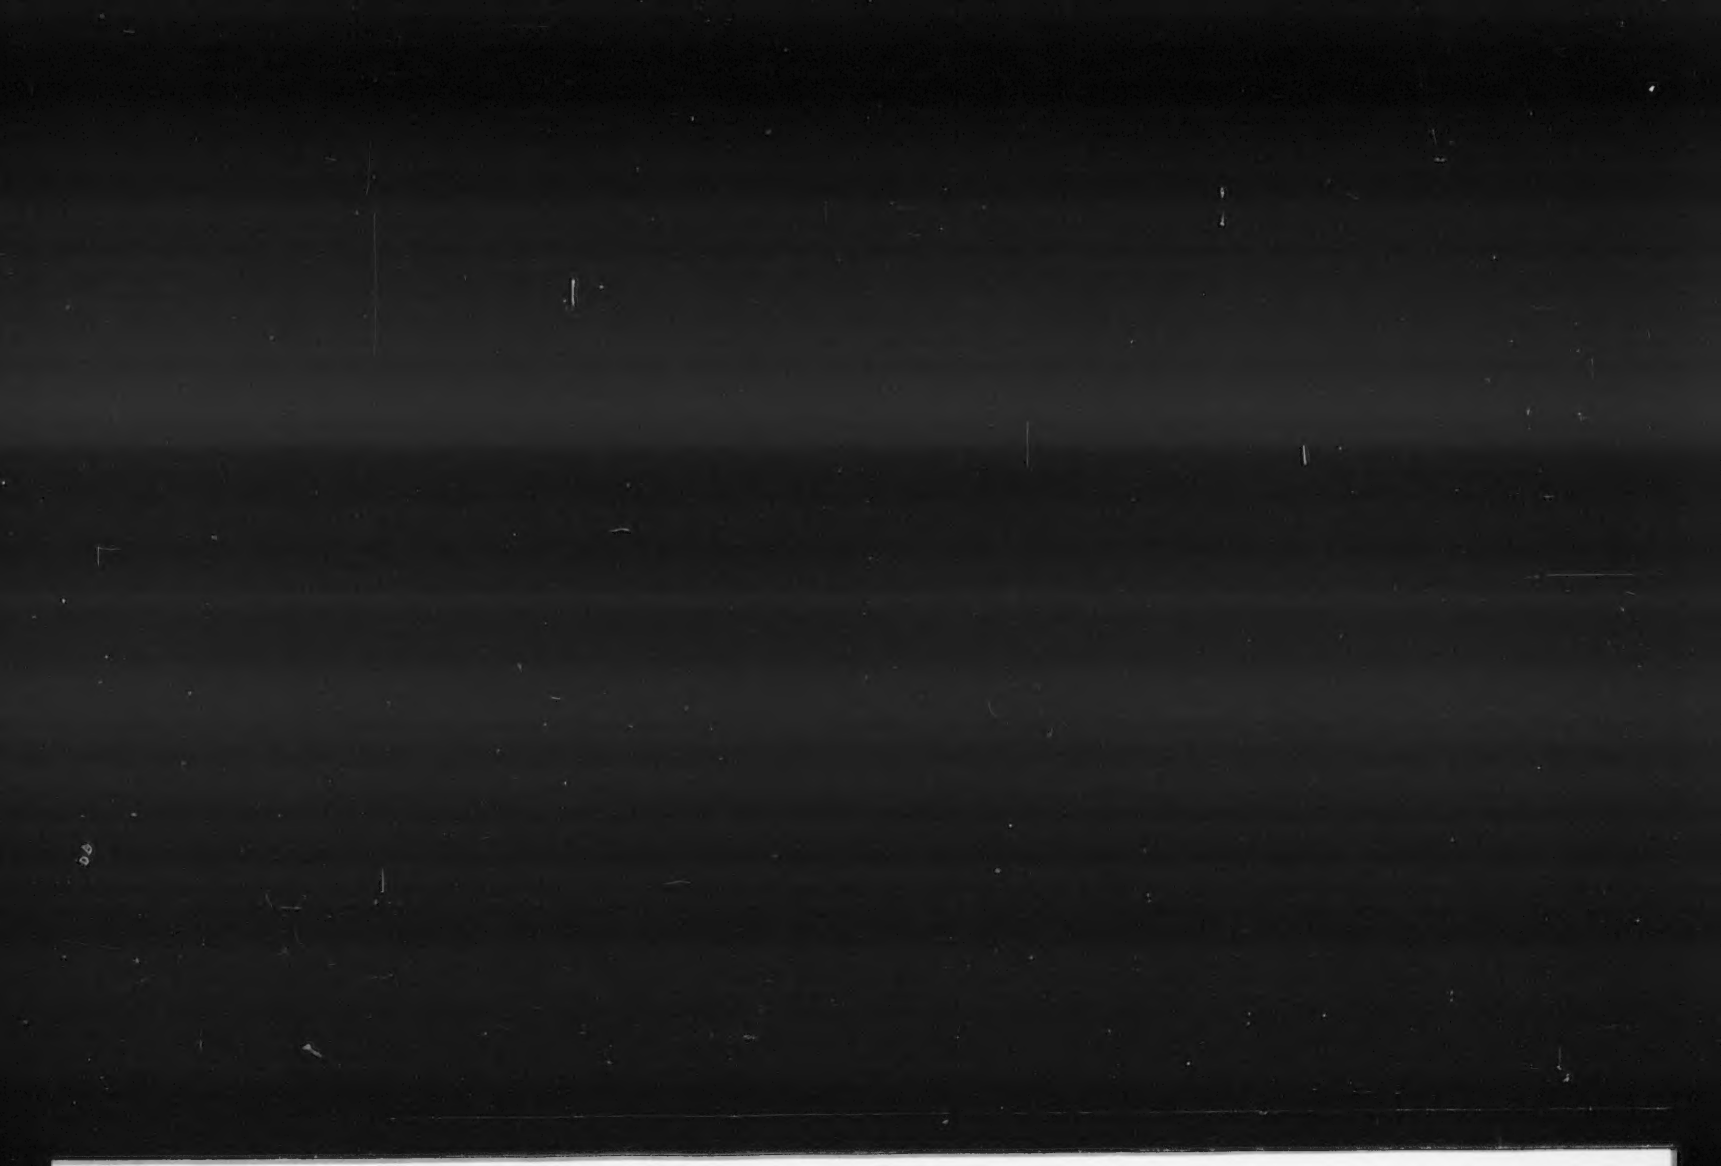
1 Aerodynamic Characteristics and Heat Exchange of Bodies in Nonuniform Supersonic Gas Flow Fields
I.G. Yeremeytsev, N.N. Pilyugin, V.S. Khlebnikov and S.A. Yunitskiy
115 The Boundary Element Method in Problems of Flow Over Ducted Bodies
Yu.P. Deynekin
121 Effect of a Finite Sink on the Rotation of a Linear Viscoplastic Fluid
A.S. Dudko
129 Pressure Control in Open-Loop Water Tunnels
V.K. Viter and V.M. Ivchenko
136 Droplet Size Change in Two-Phase Flow Through a Swirler
V.I. Ivanovskaya and V.V. Guguchkin

Number 5

1 An Experimental Study of Detonation-Induced Flow and Breakup of a Layer of Viscoplastic Material
A.L. Gonor, A.I. Zubkov, O.M. Kokashrov and V.A. Brykov

13 Calculation of the Flow Ensuing Upon Underwater Explosion of a Spherical Charge
A.L. Gonor, V.N. Likhachev and Ye.V. Timokhina
21 Distortion of the Structure of the Turbulent Boundary Layer by High Free-Stream Turbulence
A. Pedisius, V. Janusas and G. Zygmantas
40 Separation Zones in Flow Over a Cylinder Base
A.S. Guzeyev and D.I. Dianov
44 Effect of Cavitation Bubbles on Dynamic Loading
N.M. Beskaravaynyy, N.M. Kovalev and V.A. Pozdeyev
51 The Effect of Gravity on Three-Dimensional Cavitated Flows
V.N. Basharova and V.N. Buyvol
57 Mechanics of Inhomogeneous Media
V.V. Struminskiy
74 Structure of Shock Waves in Gas Mixtures
G.A. Ruyev, V.M. Fomin and M.Sh. Shavaliev
85 Particles with Correction for the Effect of the Intrinsic Electromagnetic Field, in the RMS Approximation
V.M. Lykosov and B.V. Filippov
94 Effect of a Charged Component on the Drag on a Cylinder in a Rarefied Plasma
Yu.F. Gun'ko, Ye.K. Kolesnikov and A.P. Kuryshev
102 Effect of Average Partial Properties on Chemical Reaction Kinetics
V.Yu. Velikodnyy
114 Transport Processes in Dense Gas Mixtures
E.G. Aznakayev
119 Inertial Separation in Gas Mixtures in Crossed-Jet Systems
B.L. Paklin
126 Dissipative Properties of Kinetic Equations
V.V. Vedenyapin
133 The Kinetic Theory of Dense Gases and Gas Mixtures
V.Ya. Rudyak

Number 6

1 Numerical Modeling of Unsteady Expansion of Multidimensional Laser-Generated Vaporized Matter Flumes in Vacuum
A.P. Chirimanov
8 Expansion in Maxwellians in Problems of Monotone and Nonmonotone Isotropic Relaxation
I.N. Kolyshkin, A.Ya. Ender and I.A. Ender
18 Variational Statistical Principles in the Theory of a Gas Undergoing Physical Transformations and Chemical Reactions
M.A. Rydalevskaya
25 The Method of Two Time Scales for the Solution of the Cauchy Problem for the Boltzmann Equation
Ye.V. Yatsenko
33 Knudsen Slip in Granular Beds
V.Ye. Lyusternik and M.A. Marinbakh


41 Numerical Investigation of Relaxation in Rarefied Gas Mixtures
A.A. Pyarnpuu, G.A. Tsvetkov and V.I. Shematovich
53 Modeling of Flow of a Multicomponent, Highly Rarefied Gas over a Gas-Releasing Wall
L.L. Zvorykin, A.N. Krylov, L.V. Mishina and A.A. Pyarnpuu
62 Effect of Catalytic Properties of the Wall and of the Composition of the Gas on the Heat Flux in Hypersonic Flows over Blunt Bodies
M.M. Kuznetsov and V.S. Nikol'skiy
70 Ways of Augmenting the Dispersion of Liquids in Gas Flows
V.G. Bazarov
75 The Effective Viscosities of Suspensions and Emulsions
Yu.N. Kul'bitskiy and O.N. Ardysheva
81 Conditions Promoting Self-Ordering of Unstable Chemical Systems
V.A. Yelyukhin and L.P. Kholpanov
90 Measuring the Velocity of the Dispersed Phase in a Two-Phase Flow by Means of Three-Dimensional Spectral Analysis and Pulsed "Laser-Knife" Methods
Yu.V. Zuyev, L.A. Kolesnikova, I.A. Lepeshinskiy and V.A. Reshetnikov
95 An Experimental Study of a Two-Phase Turbulent Jet and Comparison with Predictions
Yu.V. Zuyev and I.A. Lepeshinskiy
101 Transport Phenomena in Monodisperse Ordered Systems in Flows with Transitional Reynolds Numbers
Yu.I. Boyko, N.Kh. Kopyt, A.I. Struchayev and M.N. Chesnokov
109 A Nonlocal Approach in Problems of Hydrodynamics of Media with Internal Structure
T.A. Khantuleva
116 State of and Potential for the Application of the Von Karman Theory to the Description of Turbulent Flows
V.V. Novozhilov and V.A. Pavlovskiy
124 The Effective Viscosity of a Microbubbly Medium
B.V. Boshenyatov and I.V. Chernyshev
130 Heat and Mass Transfer and Resistance in a Boundary Layer of a High-Temperature Gas with Fluctuating Velocity (or Pressure)
V.M. Fomichev
137 Contents for 1991
